# ABOUT US

पर्यावरण संरक्षणम्, With this motto our CEO & M.D. Mr. Anil Chauhan and Founder Mr. Sawan Vaishnav started their journey with Bamboo Anna in 2022. India is a country having largest population across globe and so the consumer of plastic materials in different usage of day to day life. Our focus is to serve and save mother nature and to aware our people to use alternative resources of plastic wherever it is possible. As we know human being starts his/her day with many different daily usage products mainly made of plastics in which toothbrush being commonly used, where toothbrush is having life span of 4 to 5 month after which it will end up in land field and oceans which hampers global eco system and environment. Our initiative is to target and replace mainly plastic toothbrush and other amenities of daily routine with eco friendly bamboo made products. With this we have been working in Indian market from past three years and have covered significant portion of Indian toothbrush market and we believe in future to do more better and make people aware to use eco friendly products (Bamboo Products) to replace plastic made toothbrush. We have associated with many startups and promoted them to grow in same journey of Bamboo products.

# OUR CLIENTS

We are truly grateful to collaborate with such esteemed brands and organizations as business partner. At Bamboo Anna, we believe that every product we create has a deeper impact, and we are not just growing a business, we are able to directly support farmers, local artisans, and communities. From sustainable bamboo farming to artisan craftsmanship, the people we work with—both actively and behind the scenes—help bring our shared vision to life. We are fostering change, creating livelihoods, and working toward a greener tomorrow.
